

# TC Series

## Thermal Sectional Doors

With a proven track record for thermal efficiency and extreme durability, Raynor TC Series is simply the best you can specify. With extruded polystyrene insulation thermally bonded between two steel skins, TC 300/320 doors have an exceptional R-value of 17.05, with TC200 doors featuring a 10.25 R-value.

### TC200

TC200's two-sided steel design features a laminated core of expanded polystyrene insulation for an R-value of 10.25. TC200 is offered with a number of exterior color selections and optional windows to meet your application's needs.

### TC300

The industry's benchmark for commercial sectional garage doors, the TC300 provides unparalleled Raynor reliability and stability to meet or exceed the requirements of daily use. Raynor TC300 is offered with the widest selection of quality features and options for the most common product applications requiring strength, reliable operation and maximum thermal efficiency.

### TC320

Designed for optimum strength and performance, the TC300's 20-gauge exterior steel skin and rugged hardware provides the ultimate in dependability. Raynor TC320 is ideal in applications where security and thermal protection are required.

## TC200

TC200's two-sided steel design features a laminated core of expanded polystyrene insulation for an R-value of 10.25. TC200 is offered with a number of exterior color selections and optional windows to meet your application's needs.

2" thick door sections are made from high-strength, impact-resistant steel with a thermal core of polystyrene insulation for a 10.25 R-value

TC200, White with Colonial Windows

## Features

Raynor TC200 doors are available with numerous features and options, including those listed below.

### Weatherseal

Bottom weatherseal keeps out the elements.

### Section Joints

Vinyl thermal break between interior and exterior skins, along with a section joint seal prevent weather infiltration.

### Hardware

TC200 has heavy-duty, hot-dipped galvanized steel sections with an epoxy primer and baked-on polyester finish to resist rust and impact. The rugged, hot-dipped galvanized steel track and steel wheel, ball-bearing rollers assure durable, long lasting performance.

### Windows

TC200 windows use 1/8" DSB, insulated glass and are available in several options: 24"x8", 24"x12", 34"x16" colonial, ranch, full view colonial style aluminum section, and full view ranch style aluminum section.

### Specifications & Drawings

Visit us at [www.raynor.com](http://www.raynor.com) for CSI Master Format™ Specifications, Raynor Quick Specs and Standard Drawings.

### Finished Interior

Two-sided sandwich construction provides TC doors with an attractive and durable white finished steel interior.

# TC300

The industry's benchmark for commercial sectional garage doors, this product provides unparalleled Raynor reliability and stability to meet or exceed the requirements of daily use. Raynor TC300 is offered with the widest selection of quality features and options for the most common product applications requiring strength, reliable operation and maximum thermal efficiency.

TC320 and TC300 doors feature extruded polystyrene insulation thermally bonded between two hot-dipped galvanized, rust-resistant steel skins.

# TC320

Designed for optimum strength and performance, this door's 20-gauge exterior steel skin and rugged hardware provides the ultimate in dependability. Raynor TC320 is ideal in applications where security and thermal protection are required.

TC300, White with Rectangle Windows

## Features

Every Raynor TC320 and TC300 door is built for superior performance and includes the features listed below.

### Optimum Energy Savings

Flexible, EPDM rubber flap header seal reduces air infiltration and energy costs by sealing the top of the door against the header.

### Reduced Airflow

Our dual bulb seals prevent airflow between sections. Our patented RollLock™ mechanically interlocked thermal barrier prevents heat loss and eliminates any metal-to-metal contact.

### Rugged Hardware and Springs

Your TC320 or TC300 door comes packaged with the right combination of long-lasting hardware, track and springs to precisely match your door's size and application.

### Maximum Thermal Efficiency

3" thick TC320 and TC300 door sections are fully insulated with extruded polystyrene insulation and an R-value of 17.05.

### Decreased Energy Costs

TC320 and TC300 doors help you reduce energy costs with a U-shaped, vinyl bottom weatherseal.

### Choice of Windows

TC320 and TC300 windows are available in a variety of insulated glass styles and several options. 24"x4", 24"x8", 24"x12", full view aluminum, or standard full view in 34"x16" sizes.

### High-Cycle Counterbalance Systems

For reliable operation in high traffic areas, choose high-cycle torsion springs with 25,000; 50,000 or 100,000-cycle life. For reduced maintenance and ultra-smooth operation in heavy-use applications, choose a weight counterbalance system.

TC320, Red Powder Coat with Rectangle Windows

## Jamb Seal

Helps to decrease energy costs and reduce air infiltration by sealing the side of the door when closed.

## Locks

In applications where control and access are important, choose from a variety of locking options to help keep your building secure.\* Locks come in both inside and outside variations.

## Customized Track and Hardware Systems

Track systems are supplied to fit special clearances, inclines or contour applications. Hardware and track systems can be designed to fit any need.\* Additional trussing is available for special wind loading applications.

## Pedestrian Door

Pedestrian doors are designed for convenient entry and to help minimize energy loss.\*

## Removable Center Posts

Carry-away and swing-up options are available for extra-wide openings. Ideal for agricultural or airplane hangar applications.

## Carbon Monoxide Vent

Allows you to channel fumes to the outside when door is closed. Available in a variety of sizes.

## IECC Requirements Package

The International Energy Conservation Code (IECC) requires building components to meet minimum U-factor and Air Infiltration rates. This option will ensure the TC320 and TC300 will exceed the latest IECC standards by using the required header and jamb seals and track mounting. Windows, exhaust ports and pass doors cannot be used. Raynor's IECC package yield the following results:

Model	U-Factor	Air infiltration at 25mph
TC320	0.19	0.19 cfm/ft <sup>2</sup>
TC300	0.19	0.19 cfm/ft <sup>2</sup>

*\*Some options may be limited to door size or model. Contact your local Raynor Authorized Dealer regarding availability for your applications.*

## Commercial Operator

Raynor ControlHoist™ 2.0 (with solid state logic board control) operator is available in a variety of motor, voltage, and phase combinations for any commercial or industrial application. Contact your local Raynor Authorized Dealer to select the operator and accessories that are suited for your door's size and usage.

# Professional Installation and Service

## Depend on your Raynor Dealer

When you select Raynor, you're not just getting a superior garage door - you're also getting professional garage door installation and service expertise.

Every Raynor garage door is installed by a trained Raynor professional. And that means added benefits for you. First, you won't have to deal with it yourself. And because it's done right the first time, your door will deliver performance and reliability from the day it's installed. Your technician will check your door for everything from safety to performance to appearance. Trust your Raynor garage door to someone who knows it better than anyone else, your professional Raynor Dealer.
